

## DDS Function/Arbitrary Waveform Generator

### GPS-2100 Series

The Function/Arbitrary Waveform Generators adopt the direct digital synthesis (DDS) technology, which can provide stable, high-precision, pure and low distortion signals. Its combination of excellent system features, easiness in usage and versatile functions makes this generator a perfect solution for your job now and in the future.

The function generator has a clear and simple front-panel. The user-friendly panel layout and instructions, versatile terminals, direct graph interface,
